

PROFILE

I am a web developer with a passion for building dynamic web applications. I have a solid background in full-stack development using the MERN stack and Python Django.

My goal is to leverage my skills and knowledge in a challenging environment to

contribute to team success and advance my career. I thrive on collaboration and continuous learning from peers.

DESAI DIXIT

FULL STACK DEVELOPER

EDUCATION

Degree	Institute	Score /Year Of Passing
B.C.A. (Bachelor of Computer Applications)	R.B. Institute of management studies GTU (Gujarat Technological University)	CGPA :- 7.20 Passing :- 2024
Higher Secondary School	GSEB	Percentage :- 74% Passing :- 2021

TECHNICALSKILLS

- **Frontend Development** : - React.js, HTML, CSS, JavaScript Tailwind CSS and Bootstrap
- **Backend Development**: Node.js, Express.js, MongoDB , Python , Python Framework Django , SQL , SQLITE Database
- API Development and Integration
- Project Management and Team Collaboration
- Problem-Solving and Critical Thinking
- GitHub: Version Control and Collaboration

TASK

- TODO List
- Web Design
- Product API
- Animation
- Use Packages

INTERSHIP EXPERIENCE

Company: Coding Cloud

Duration: January - September

Role: Mern Stack Development Intern

PROJECTS : -

(1). To-Do App Development (React)

- Developed a fully functional To-Do application using React.
- Implemented features such as task creation, updating, and deletion.
- Utilized state management with hooks to maintain the application's state.
- Ensured a responsive and user-friendly interface.

(2). Hollybooks (MERN Stack)

- Successfully completed Hollybooks, a comprehensive project developed using the MERN stack (MongoDB, Express.js, React, Node.js).
- Contributed to both backend and frontend development.
- Designed and implemented RESTful APIs for seamless communication between the client and server.
- Integrated user authentication, data management, and optimized overall application performance.

(3). Ecommerce Application (MERN Stack)

- Developed an Ecommerce Application with user and admin functionalities using the MERN stack.
- Admin Features:
 - Add, update, and delete product categories.
 - Manage products and view user orders.
- User Features:
 - Browse products by categories.
 - Add products to cart and place orders.
 - Created a dynamic category-based product display and ensured a smooth user experience.

(4). Chat Application (MERN Stack)

- Built a Real-time Chat Application using the MERN stack.
- Features include:
 - One-to-one and group chat functionality.
 - Real-time communication using WebSocket (Socket.IO).
 - User authentication and profile management.
- Designed a responsive and visually appealing interface to enhance user engagement.

(5). Ecommerce Project (Python Django)

- Built an Ecommerce Application using Python Django framework.
- Admin Features:
 - Add, update, and delete products and categories.
 - View and manage user orders.
- User Features:
 - User registration, login, and authentication.
 - Product search, filtering, and cart management.
 - Order placement and tracking system.
- Utilized Django templates to create a responsive and intuitive frontend.
- Integrated a secure payment gateway to facilitate online transactions.

LEARNED FROM EXPERIENCE

- ERROR: When I was learning in the beginning, I realized that if there is an error of a single dot then you do not get scared, otherwise you not see that error, so it is important to be focused.
- TIME-LIMIT: When you work under time pressure, do not pay attention to the time; you should think about how you can complete the work by keeping your mind calm.
- Team value: If you want to make a good project through creativity, then you need the support of a team so that every member can make the project with his unique idea.

TECHNOLOGIES USED :-

Frontend: React, JavaScript, HTML, CSS
Backend: Node.js, Express.js , Python Django
Database: MongoDB, SQL SQLLITE
Tools: Git, GitHub, VS Code

CERTIFICATES

- Coding Cloud :-
MERN Stack Development
